

Google Workspace for Education

Summary

Google Workspace for Education (WfE) administrators manage which Core and Additional Services their users can access with their accounts. This guide is to help parents understand how Bishopswood school uses Google services, what information Google gets when they use these services, and how Google uses that information.

Google Workspace for Education offers two categories of Google services: **Core Services** (like Drive, and Classroom) that are provided under our school's Google Workspace for Education agreement, and **Additional Services** (like YouTube, Maps, and Blogger) that can be used with Google Workspace for Education accounts.

At Bishopswood each child has a WfE account which is primarily used to log into Chromebooks to access software for the child's learning. All WfE accounts used by children are marked as an "under 18" user.

Parent or guardian consent where appropriate

Bishopswood school provides consent for **Core Services** on parents' behalf by signing up for and using these Google Workspace for Education services. These comprise:

Assignments

Calendar

Classroom

Drive and Docs

Chrome Sync

Google Meet

Keep

Sites

Tasks

Note that Gmail and Jamboard are not enabled for any student accounts.

Google Workspace for Education requires in its agreement (section 2.5) that schools obtain parent or guardian consent for any **Additional Services** they allow students under the age of 18 to use. Bishopswood School do not enable any Additional Services for any of the student's accounts.

More information about Google Workspace for Education can be found on their website:
